

Technical Instructor / Developer

Job Number: 387299

Location: St Paul, MN

Business Unit : Hussmann

Ingersoll Rand is a \$13 billion company whose people and businesses around the world create progress for our customers in the global climate control, air conditioning and heating, industrial and security markets. These markets continue to expand as they address growing needs in developed and developing economies alike. Our products, systems and solutions increase the efficiency and productivity of industrial, commercial operations, homes, and improve the security, safety, health and comfort of people around the world. We have opportunities for career growth through our diverse businesses, which manufacture many well-recognized brands including Club Car, Hussmann, Ingersoll Rand, Schlage, Thermo King and Trane. In every line of business - Ingersoll Rand enables companies and their customers to inspire progress. For more information about Ingersoll Rand visit www.ingersollrand.com.

Providing temperature-controlled environments for food and other perishables are essential in today's global market. Through our Climate Control Technologies sector and Thermo King and Hussmann brands, we provide global solutions for the transportation and retail refrigeration market.

As Technical Instructor, you'll design, develop, deliver, evaluate and update specialized training programs that advance the knowledge, skills and productivity of technicians employed by Ingersoll Rand Climate Solutions and its dealers, distributors, OEMs, and customers. Primary responsibility will be the delivery of training solutions for Hussmann commercial refrigeration products and selected other products and services.

Position Responsibilities:

- Instruct technical classes pertaining predominately to commercial refrigeration from fundamental to advanced subject matter and curriculum based on the needs of participant population
- Assist in the instructional design and development of all course components, following adult learning methodology; These components include instructor material, hand-outs, job performance aids, pre-work, pre and post assessments and other required training materials
- Develop / maintain partnership with key business leaders by developing needs analysis as required to support new course design / implementation; Maintain expert level product and system knowledge
- Provide content and subject matter expertise to enable the development of; e-Learning modules, digital media and other distance learning

- Evaluate the impact of learning materials, methods and strategies and recommend improvements. Helps to streamline and improve Instructional design processes
- Pilot new courses and materials, conduct on-going assessments of materials, and update/revise as necessary; Evaluate, develop and/or apply new methods of improving technician performance
- Manage specialized training requests to include presentations / workshops designed around specific customer base
- Perform set-up, troubleshooting, and maintenance of classroom equipment

Qualifications:

In-depth understanding of refrigeration systems, electrical systems, and microprocessor controls Excellent oral and written communication skills

2 year degree in Vocational, Technical, Education, Engineering, or related field is required; Experience will be considered in lieu of a Bachelors degree

Minimum of 10 years technical experience in supermarket refrigeration required

Must be able to travel (25-35%); Appropriate international travel documents may be required. Mobility within the work facility and ability to travel independently

A valid driver's license is required; Ability to lift 50 pounds

If you share our passion for inspiring progress-for bringing about bold shifts in how people, economies and societies operate-then you belong with Ingersoll Rand. Ingersoll Rand is committed to a diverse workforce and is an Equal Opportunity Employer.
